PROFESSIONAL SUMMARY

Project-focused technology professional with 10+ years of experience in structured, outcome-driven environments. Specializes in project ownership, implementation coordination, and stakeholder communication across technical and business teams. Proven ability to translate complex requirements into clear execution plans and guide initiatives from planning through delivery. Thrives in project-based roles with defined goals, accountability, and measurable impact.

CORE SKILLS

Project Coordination • Implementation Support • Stakeholder Communication • Solution Delivery
Project Ownership • Cross-Functional Collaboration • Requirements Gathering • Process Improvement • Technical Project Support

PROFESSIONAL DEVELOPMENT

TripleTen — Software Development Program

Remote | 2025 – Present

- Completing a structured, project-based software development program focused on coding fundamentals and technical problem-solving
 - Building and iterating on hands-on coding projects with defined requirements, timelines, and deliverables
 - Applying planning, execution, and ownership skills in a technical environment
 - Collaborating with mentors and peers in a remote setting to review work and improve solutions
-

PROFESSIONAL EXPERIENCE

Bill.com — Sales Executive

Houston, TX | 2021 – 2022

- Led end-to-end onboarding and implementation coordination for new customers, guiding projects from discovery through system setup
 - Translated customer requirements into structured implementation plans, automating up to 90% of manual accounts payable workflows
 - Coordinated internal teams and customer stakeholders to ensure clear ownership, timelines, and successful delivery
 - Managed multiple concurrent customer initiatives while meeting adoption and performance targets
 - Supported and trained junior team members on discovery, documentation, and effective project handoff practices
-

Hewlett Packard Enterprise — Data Storage Specialist

Dallas, TX | 2018 – 2021

- Served as subject matter expert for enterprise data storage solutions, supporting planning and delivery across multiple accounts
 - Collaborated with account teams, channel partners, and technical stakeholders to define scope, timelines, and requirements
 - Assisted in planning and delivery of complex infrastructure projects involving storage, cloud, and hybrid environments
 - Trained internal teams and partners on solution capabilities, industry trends, and implementation considerations
-

Sirius Computer Solutions(now CDW) — Inside Client Executive

Dallas, TX | 2015 – 2018

- Coordinated multi-solution technology initiatives across cloud, security, networking, and data center environments
 - Partnered with IT leaders and executives to gather requirements, define objectives, and support solution delivery
 - Managed multiple concurrent initiatives while maintaining alignment across stakeholders, timelines, and expectations
 - Assisted with onboarding and training new hires to accelerate performance
-

Cbeyond — Outside Sales Representative

Houston, TX | 2012 – 2014

- Managed a defined geographic territory delivering telecommunications and technology solutions to SMB customers
- Built and maintained structured customer initiatives aligned with organizational goals
- Presented project-based solutions to management teams and executives
- Documented customer requirements and project
